Support your medical teams

A medical team has been involved in the design of MediPep, with the objective of decreasing team workload through time optimization.

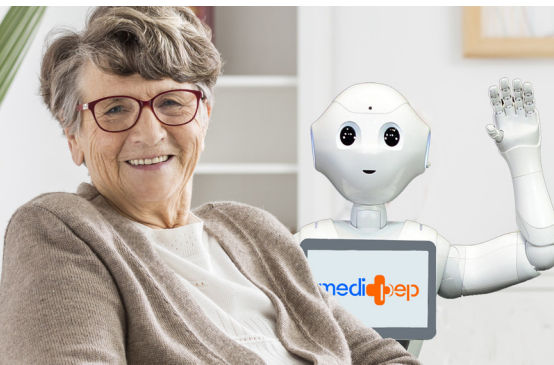

The information collected by the robot improves clients' health monitoring by the medical team while ensuring clients' safety. The robot performs repetitive and basic health monitoring checks, giving the medical team time and relevant data to engage with clients.

MediPep is specially designed for :

Retirement homes, Nursing Homes, Condominiums,
Medical Offices and Hospitals.

Assisted autonomy

MediPep fosters clients' assisted autonomy.

Specifically designed for the elderly

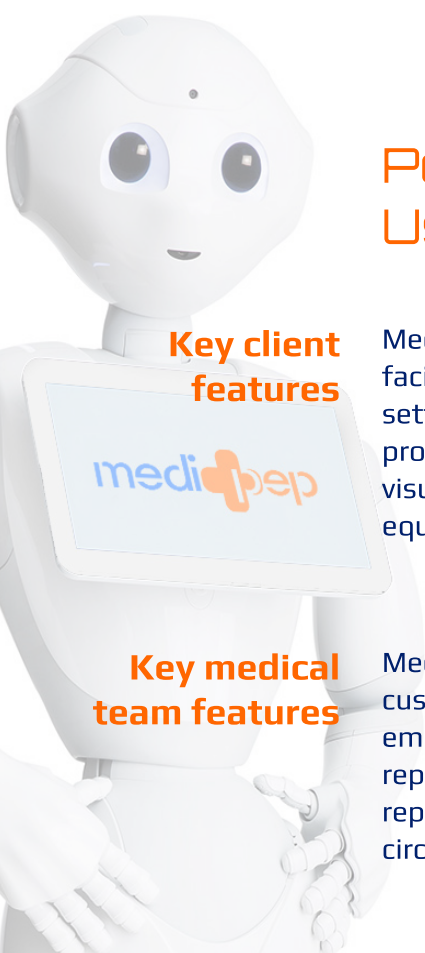

MediPep focuses on the most autonomous clients, whose demands in terms of care often go unnoticed as medical teams are pressed for time in managing health emergencies.

Performing Health Check-up

Functionalities 1.0

MediPep evaluates pain, hydration and transit, and measures vital parameters. With MediPep, clients can easily participate and manage their own basic medical check-ups, regardless of the availability of medical teams.

MediPep operates 24/7 and as often as needed.

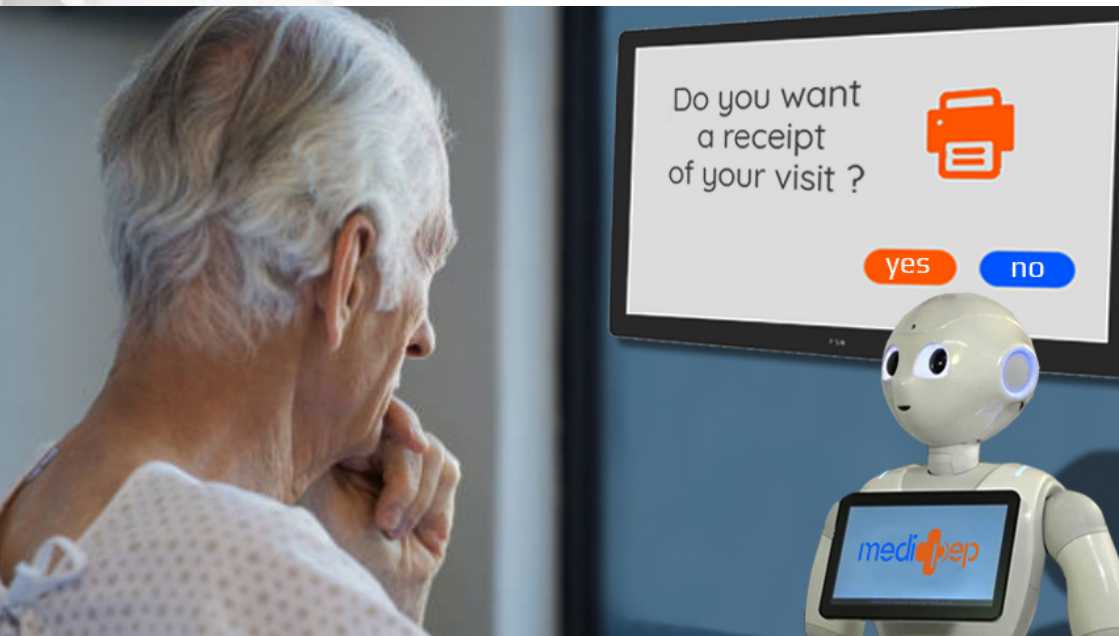

Powerfull User Experience

Key client features

Medi'Pep uses automatic detection and facial recognition, automated personal settings, custom dialogues, phonetic name pronunciation, integrated voice control, visual tutorials, and operates with auxilliary equipments (TV, printer, ...).

Key medical team features

Medi'Pep offers a user-friendly and highly customizable management system including emergency and vital parameters settings, report printing, vetting of clients, automated reports and emergency calls, information circuit management and client logs.

Seamless Integration

Medi'Pep is regularly
uploaded with new
features.

Medi'Pep is a fully autonomous and plug-and-play device, including easy settings, control via web portal and remote updates. Available in 12 languages.

Medi'Pep will be available in French starting July 2018, and in English, German, Italian, Polish and Dutch in 2019.
Please contact us for other languages.
